

# HAZARD IDENTIFICATION, RISK ASSESSMENT AND RISK CONTROL (HIRARC)

DATE: 22 & 23 FEBRUARY 2024

TIME: 9AM - 5PM

VENUE: EASTIN HOTEL PETALING JAYA

Generally every employee is exposed to hazards at work. However not many are aware of the threats posed by these hazards that could harm and endanger life. It is therefore important for organizations to conduct Hazard Identification, Risk Assessment and Risk Control (HIRARC). The organizations that have carried out HIRARC reported positive change and reduced the risks. This training aims to deliberate the systematic and objective approach on HIRARC with reference to the published Department of OSH *Guidelines for Hazard Identification, Risk Assessment and Risk Control, 2008*.

## OBJECTIVES

By the end of the 2-day training, the participants should be able to:

- Identify physical hazards at work;
- Analyze and Estimate risk of the identified hazards;
- Select a suitable control ; and
- Conduct documenting process.

## Topics Covered

- Provisions of OSH Act 1994 on HIRARC
- Purpose of HIRARC
- Basic Concepts
- Planning and Conducting of HIRARC
- Control
- Documenting HIRARC

## TARGET AUDIENCE

This training is designed to train:

- Safety and Health Committee members
