22 - 23 Sept 2023

Le Quadri Hotel, UCSI Cheras, Kuala Lumpur

## COURSE OVERVIEW

In today's highly competitive environment, many organizations are undergoing major changes in their structure and management.

As a result, businesses are undertaking Business Process Improvement with Lean Six Sigma to bring much-needed innovations to outdated business processes.

This course involves fundamentally rethinking and radically redesigning business processes to achieve dramatic improvements in key contemporary metrics such as cost, quality, service, and speed by using Lean Six Sigma tool.

**Through this initiative, many famous companies have transformed their businesses. So, why don't you?**

## LEARNING OUTCOMES

Understand an integrated approach to transform business processes

Understand process redesign / reengineering

Critical thinking skills, conceptual knowledge and best practice techniques

*"Overall, this course is good and the key points are reduce the waste and increase the efficiency by sustaining it."*

*Senior Manager,  
Wilmar Group (Malaysia)*
